## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Janssen, Jr. et al. (US Patent No. 5,376,217).

Janssen discloses a roller pair (130, 132) forming a nip and operable to move at least one sheet through the nip in a process and reverse direction. Also included is a sticker applicator (112) and a conventional controller (90).

Regarding claim 2, the sticker applicator (112) interposes a sticker in a path of a sheet.

Regarding claim 7, Janssen includes a dispenser (116).

Regarding claim 8, Janssen includes a spool (22).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1734

4. Claims 1-6 rejected under 35 U.S.C. 103(a) as being unpatentable over Malachowski et al. (US Patent No. 5,118,375) in view of Janssen.

Malachowski discloses a roller pair (50) forming a nip and operable to move at least one sheet through the nip in a process and reverse direction. Also included is a sticker applicator (22).

Malachowski does not disclose a control system for operating the roller pair to move the sheet, but suggests that the apparatus can be readily controlled using a conventional control system.

A conventional control system is used in Janssen.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a control system in Malachowski, because there is suggestion in Malachowski that a control system is within the purview of an artisan.

Regarding claim 2, the sticker applicator (22) interposes a sticker in a path of a sheet.

Regarding claims 3-6, Figure 7 of Malachowski discloses a set of crease rollers, forming a folding nip disposed upstream of the sticker application process.
